# VARUN ARORA

## PROJECTS

### TrackrBot                                    CodeDay NY 2014

- Custom value tracker for the web
- Any value accessible publicly on the web can be tracked and stored by TrackrBot's custom scraping algorithms.
- Implemented using Node.js, MongoDB, and Python

### TxtNote                                       HackRU Fall 2013

- SMS-based review retrieval service
- Just text a number with the name of the media, and get it reviewed.
- Implemented using C# and Twilio

## SKILLS

### Languages

- Proficient in: Java, Javascript, HTML5, and Bash
- Familiar with: Python

### Technologies

- Proficient in: Git, Linux, Bootstrap, Node.js, and MongoDB
