VARUN ARORA

PROJECTS

TrackrBot   **CodeDay NY 2014**
- Custom value tracker for the web
- Any value accessible publicly on the web can be tracked and stored by TrackrBot's custom scraping algorithms.
- Implemented using Node.js, MongoDB, and Python

TxtNote   **HackRU Fall 2013**
- SMS-based review retrieval service
- Just text a number with the name of the media, and get it reviewed.
- Implemented using C# and Twilio
